PSA: Windows 8 & 10 Compatibility Issues:

A lot of people have been emailing us about their game not launching. So far it has been only happening with Windows 8 & 10 machine due to the fact that the RPG Maker engine is a pretty old engine. The best fix which seems to work every time is to set the compatibility mode of Suits to Windows 7 or XP. If you don't know how to change the compatibility mode here's how to do it:

<https://support.microsoft.com/en-us/help/15078/windows-make-older-programs-compatible>

. **Suits: A Business Soundtrack Available Now for FREE!:**

It has been a long time since we said that we would be releasing the soundtrack for Suits, but we have been very busy working on our new game Zoopocalypse(Now on Steam Greenlight). Originally we were going to release this soundtrack much sooner, but Steam was giving us some issues with uploading the files and we just moved on. Now it's available for anyone who owns Suits:A Business RPG for free. Why free you may ask. Well we believe since you own the game why charge you extra money to listen the music that was already in the game that you paid for. We understand that some developers sell the soundtrack in order to support themselves, but we don't really care. Anyway enjoy the free soundtrack. :)

-MAL_Ware. **Zoopocalypse now on Greenlight:**

We have been working real hard after the success of Suits: A Business RPG to bring you all our next game Zoopocalypse. We still have a long way before we can release it so please help us by sharing this Greenlight page with your friends. The sooner we are greenlit the faster we can finish.

Hi everyone, I know that it's been a year since Suits was released and that some people were a bit disappointed that we haven't ported it to Mac or Linux. I had discussed this topic on the forum and I said that it wasn't going to happen for a long time. Well I recently wanted to see if I could port Suits to the new RPG Maker engine and good news is that it worked!. However some things are missing from the port, but it's nothing game changing other than the lack of Steam achievements since I couldn't find a plugin to use for that. The plan is to release the new version of Suits, for free, but you will have the launch options to choose with version you want to play. Sadly this will only be for Windows machines since the original version of Suits can only run in windows. The new version of Suits might fix some of the compatibility issues with new machines. I need to test the builds out first and make sure it works on Mac and Linux since it is a bit tricky to get working, but things are looking good. Once we release this free upgrade we will also be having a big sale just to get more people to play our game. In the future we will try to launch our game with Windows, Mac, and Linux support.
