The screenshot displays the Lazy Nezumi Pro software interface. On the left, a settings panel titled "smoothing - subtle" includes options for Position Smoothing, Pressure Curve (with a Graph button), Gain (1.00), Softness (0.44), Minimum Value (0.00), Maximum Value (1.00), Invert, Stroke Average (In: 0.47, Out: 0.66), Stroke Max (In: 0.75, Out: 0.85), Pressure Processing, Pressure Speed Scaling (with a Graph button), Tilt and Rotation Smoothing (with a Graph button), Distortion Scripting (with a Graph button), and Sample Interpolation. On the right, a "Pressure Curve Graph" window shows a graph of Output Pressure vs. Input Pressure with a curve and two data points: "Last Stroke Max Pressure" (purple square) and "Last Stroke Average Pressure" (cyan square). The main canvas features a cartoon character with red hair and a green shirt, a color palette, and a play button icon. A yellow "LN" logo and a YouTube icon are also present.
